

NEW DIRECTIONS

In Innovations

Looking Beyond Tomorrow

As Stolle helps develop the future of metal packaging technology, we are constantly building on our rich legacy of innovation to discover and develop the products and services that will propel you beyond your production goals. Stolle's team of research and development engineers and technicians, assisted by young minds from universities around the world, are dedicated to developing the ideas that will help you today, while looking for the innovations of tomorrow... from systems that are infinitely greener, to equipment that can be easily scaled to fit any level of production.

Stolle is moving in new directions - at the speed of innovation.
