Stolle Machinery Co, LLC Closes on CCH Engineering Acquisition

CENTENNIAL, Co. – Stolle Machinery Co, LLC announced today it closed on its agreement to purchase CCH Engineering Ltd. of Carlisle, Cumbria, UK.

“This strategic acquisition enhances the scale, market reach and product offerings of our existing Stolle businesses,” Stolle Machinery Chief Executive Officer Robert Isaman said. “It particularly strengthens our positions in Europe and Asia and expands our product and service offerings to a broader range of customers there.”

The CCH Engineering business now becomes part of the new Stolle Global Solutions Group, headed by President, Global Solutions, Gus Reall. “We welcome Steve Higginson, Managing Director of CCH Engineering and his team into the Stolle global family,” said Reall. “We anticipate a quick and seamless transition.”

CCH Engineering’s core business activity is the provision of high efficiency, high up-time turnkey production lines, line relocation, project management and engineering services for both can and end manufacturers worldwide. In addition to the activity of turnkey projects, CCH also provides the necessary ongoing technical support and OEM spares programs to keep the can and end plant profitable. More information about CCH Engineering, Ltd. can be found at website: www.ccheng.com.

Based in Centennial, Colorado, USA, Stolle Machinery Co, LLC is a global market leader in the provision of high technology capital equipment and services to the beverage, food, and consumer container industries. Stolle Machinery Co, LLC is a portfolio company of GSO Capital Partners, a unit of The Blackstone Group.
