

Vertical Vacuum Infeed Retrofit

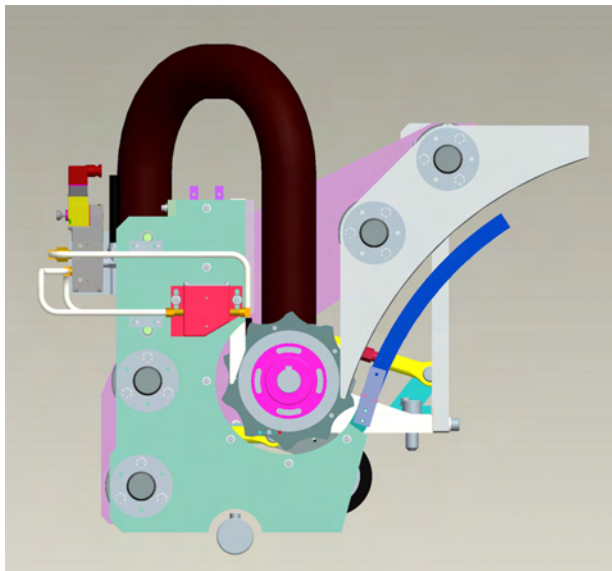

For the Stolle Rutherford Decorator and Basecoater
January 2009

The Vertical Vacuum Infeed is the highest speed capable infeed ever designed for Rutherford Decorators and Basecoaters. It is rated at 2200+ CPM. This infeed is compatible with all can sizes with the appropriate change parts.

The Vertical Vacuum Infeed loads one station sooner than the previous angled infeed, which provides more time to load the cans onto the starwheel. This also helps to ensure that there are no gaps between cans coming into the starwheel. All of the adjustments for the Infeed are in the front for easy access and fast set-up. The Vertical Vacuum Infeed retrofit comes partially assembled by Stolle and will fit all Rutherford Decorators and Basecoaters.

Please contact Stolle CMD at 303-708-9044 for more information on the Rutherford Vertical Vacuum Infeed retrofit.
